SUMMARY

Frontend Developer with hands-on experience shipping production web applications using Next.js, TypeScript, and Tailwind CSS. Skilled at translating requirements into responsive, maintainable interfaces, integrating third-party services (payments, auth, data fetching), and collaborating cross-functionally to ship efficient, user-friendly digital products.

SKILLS

Languages & Core: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks & Libraries: Next.js, React.js, Tailwind CSS, ShadCN UI, TanStack Query, Framer Motion
Data & Backend Integration: REST APIs, MongoDB, Stripe, Clerk, Resend
Tooling & Practices: Git, GitHub Actions, Responsive Design, SEO, Figma, Agile, State Management
Languages Spoken: Arabic, English, Turkish

EXPERIENCE

Frontend Developer | *gedik university* Aug 2026 - Present

- Established the project's foundational frontend architecture and core application structure.
- Reviewed application security and addressed potential vulnerabilities in API handling and access control.

Full Stack Developer | *Murakkaz Blog (Full Stack Application)* Apr 2026 - Aug 2026

- Developed a full-stack article publishing platform using Next.js, TypeScript, Tailwind CSS, and MongoDB, with TanStack Query for server-state management and data fetching.
- Implemented infinite scrolling with paginated article fetching, loading additional content as users scroll to provide a seamless browsing experience.
- Implemented on-page SEO and a full-content RSS feed to improve article discoverability and expose complete article content in a structured, machine-readable format for content aggregation and AI-assisted retrieval.
- Optimized API request handling and rate limiting to help protect endpoints from excessive requests while maintaining reliable access to content.
- Delivered a responsive, fast-loading reading experience with a focus on readability, navigation, and content discovery.

Frontend Developer | *Haraka Company* Nov 2024 - Oct 2025

- Built the frontend architecture for Haraka, an internal operations/project-management platform, using Next.js, TypeScript, and Tailwind CSS for scalability and responsiveness.
- Integrated TanStack Query for efficient client-side data fetching and caching. reducing redundant network requests.
- Implemented ShadCN UI to deliver a consistent, modern design system across the platform.
- Collaborated with cross-functional teams to translate internal operations requirements into functional, user-friendly interfaces.

Frontend Developer | *Courses Store (Full Stack Application)* Aug 2023 - Sep 2023

- Developed a full digital course marketplace using Next.js for both frontend and backend logic, with MongoDB for data persistence.
- Integrated Stripe for payment processing, Clerk for authentication/user management, and resend for transactional email notifications.
- Designed an intuitive browsing and enrollment flow styled with Tailwind CSS.

EDUCATION

Istanbul Gedik University - Turkey
B.Sc. Computer Engineering - 2028
